

Saver® Data Management

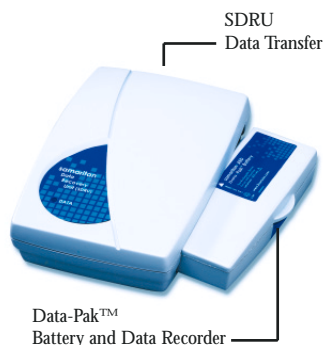

HEARTSINE™
TECHNOLOGIES

*A history of innovation...
A future of lifesaving technologies.*

Helping you... Analyze Data.

- Easy-to-use interface
- Reliable data records
- Comprehensive event documentation
- Audio record playback
- Clear event notes
- AED configuration functions.

Intelligent and easy to use

Saver® is an event data management software specifically designed to display and analyze recorded events from the Samaritan® AED. The Samaritan® AED is an automated external defibrillator used to deliver external defibrillation therapy to resuscitate victims of sudden cardiac arrest (SCA).

Simple and Reliable Data Recovery

Each Samaritan® AED uses an Data-Pak™ Battery. This unique battery simultaneously powers the unit and records information (event resuscitation, patient ECG, logged events, timing and device status) which gives a complete patient record for physician oversight, reporting and Utstein data collection. Data transfer is as easy as removing the battery from the Samaritan and placing it into the Samaritan® Data Recovery Unit (SDRU) which then downloads data to your PC. No more expensive data cards to lose, break or purchase.

Easily Upgrades one or more AED's

As well as allowing you to analyze data, Saver® also gives you the flexibility to configure and upgrade your Samaritan® AED. Using Saver®, you can configure an Data-Pak™ Battery with configuration and upgrade features. These new configurations are then applied to the Samaritan® AED when the Battery is installed into the unit. For example, you can use Saver® to set speaker volume, screen contrast, time and date synchronization.

Data review, printing and archiving

The Data-Pak™ battery can store up to 12 hours of ECG and 60 minutes of voice plus all associated text, logged events, device status markers. The Saver® - Data-Pak™ - Samaritan® AED combination provides a complete documentary record of multiple resuscitations. The Samaritan®'s comprehensive event documentation helps you comply with AED reporting regulations.
