

What is
NationalSafetySolutions

NationalSafetySolutions is a comprehensive AED Management System which provides turn-key solutions designed to increase community and workplace safety standards. These solutions are suited for a variety of businesses—from the small company with only a few employees at a single location, to the large corporation with thousands of employees at locations throughout the country or throughout the world. As a provider of nationally-recognized medical oversight services, as well as a leading innovator of Management Information Systems, we combine our abilities to offer our clients the quality solutions specifically designed “To Help Save Lives”.

Early Defibrillation Program Management

Managing an Early Defibrillation Program can become an overwhelming and complicated process. From monitoring the expiration dates of batteries and electrode pads, to overseeing the re-certification training schedules of employees, to implementing emergency protocols, managing a program alone can become a challenging task.

“Our job is to make your job easier”

Our systems are designed to offer a Complete Turn-Key AED Solution, with fully comprehensive and easy-to-manage services which include the components necessary to help make an Early Defibrillation Program a success. The following are the components which make up our **AED Management Systems**:

webAED

A one-of-a-kind, web-based AED Management Program which is designed to track and monitor AED’s, review the training certifications of Emergency Response Teams, and completely manage Early Defibrillation Programs.

MD-AED

A Medical Direction Program which offers initial Physician’s Prescriptions, as well as Medical Oversight Services and Governmental Compliance and Emergency Protocols.

webAED+Plus

A Complete Turn-Key AED Solution System which combines both the AED Management and Medical Direction Programs.

“Serving our clients is our number one priority”

Program Descriptions

What is
webAED

webAED is a fully-comprehensive and easy-to-use *Web-Based AED Management & Tracking System*. This service enables the user the ability to easily add/edit data, view important AED information, generate reports, and completely manage a specific Early Defibrillation Program. One important feature, which is greatly appreciated by our clients, involves the automatic e-mail notifications sent whenever batteries or pads are near expiration, or whenever employees are to be scheduled for their CPR/AED re-certification. Furthermore, whenever these products or training services need to be ordered, the user can simply place an order directly off the site, and the information can be emailed to the designated product and/or service providers. **No software is required—the user simply goes to our website and enters an assigned username and password.**

What is
MD-AED

MD-AED provides your Early Defibrillation Program with *Professional Medical Oversight Services*. These services help to protect you and your business from liability under the Good Samaritan Law, and allow you to maintain compliance with all federal, state and local governmental regulations. Included with this package are the initial Physician's Prescription(s) to purchase your AED(s), as well as the on-going Medical Oversight Direction. **No physician is required—we have our own licensed, on-staff Medical Director, Dr. John C. Frist, MD.**

What is
webAED+Plus

webAED+Plus provides your Defibrillation Program with a *Complete Turn-Key AED Management Solution*. This combined package offers all the advantages of the Management and Tracking System (**webAED**), as well as the Professional Medical Oversight Services (**MD-AED**). **To "turn-the-key" and begin your Defibrillation Program, simply subscribe to this Total Solution Package—It's that easy!**

"Serving our clients is our number one priority"
