

Emergency Responders Network®

First on Scene™ AED Program

"...preventing unnecessary loss of life"

If its predictable, its preventable!

This year nearly 350,000 Americans will suffer from Sudden Cardiac Arrest (SCA) and most of them (95%) will die before emergency care arrives. Studies show that a shock delivered with an Automated External Defibrillator (AED) within a few minutes is the most effective way to increase (up to 75%!) the chance of survival for victims in ventricular fibrillation. The problem: Every minute that defibrillation is delayed, the chance of survival decreases 7-10% for victims of sudden Cardiac Arrest!

The Tools you need!

Your goal is to stabilize the victim's heart *before* the paramedics arrive. Our goal is to make sure your organization has the tools you need to do just that! The *Emergency Responders Network First on Scene™ AED Program* offers a *turnkey* solution and at a price anyone can afford... so you can focus on placing AEDs in places where people work, live and play!

All of it or just what you want!

Whether you want just some of the components or need it all, Emergency Responders Network has a solution that is right for you. Components of your AED Program may be purchased as an all-inclusive package or individually.

Emergency Responders Network First on Scene™ AED Programs are designed to help organizations more easily implement AEDs making them more accessible in places where people work, live and play. Contact us today to help you get started!

The AED (and accessories)...

- While all AEDs essentially do the same thing, there are some important differences. We will assist you in selecting the equipment you need and help you stay on budget!

The Training...

- Receiving the proper training from one of our expert trainers is a great way to empower to save a life and ensure the success of your program. We will also provide you with incredible remedial training options as well!!!

Medical Direction...

- Helping you achieve legal compliance, we offer a choice of physician oversight, program tracking and management options to help you fulfill the requirements needed to certify your AED program - leaving you to focus on the job of saving lives!

Program Implementation Manual

- Developing an effective plan to implement and maintain your AED program may be the best way to ensure your success. Our AED Implementation Guide and Reference Manual will provide you with the ingredients needed to successfully manage your AED Program from start to finish!

Live training

TRAINING OPTIONS

Whether responding to a cardiac arrest or medical emergency, it will always come down to the trained rescuer! Emergency Responders Network offers several training choices providing the flexibility your organization wants and the confidence your rescuers will need!

ON-SITE TRAINING

Our experienced instructors will empower your rescuers with the knowledge, confidence and the skills necessary to assess a victim and administer lifesaving treatment using an AED! Our courses are certified by the American Heart Association and will bring your organization into legal compliance.

Medical Direction

MEDICAL PRESCRIPTION / DIRECTION:

Federal, State and local laws define the responsibilities of the AED Program Medical Director. While generally simple in nature, overseeing a Public Access Defibrillation Program adds complexity that can become burdensome if not managed properly. The Emergency Responders Network AED Program provides the tools you need to do just that! Whether we provide the Physician or you use your own, you can be sure that the Medical Director will have everything at his/her fingertips needed to ensure it will be an effective and manageable AED Program!

INTERACTIVE COMPUTER TRAINING:

Using AHA Standards and Emergency Room Physician approved, CD based interactive training provides another option to ensure your team is always prepared. Among other things, it allows you to train when and where you want at your own pace, provides training consistency and allows you to review the material at your leisure using your windows-based PC.

Implementation

PERIODIC SKILL TRAINING:

As part of the Emergency Responders Network AED Implementation Guide and Reference Manual included with the First on Scene™ Program, all components of the required AED training are available for review.

Program Mgmt.

TRACKING AND MANAGEMENT OPTIONS:

The focus of your AED Program should be on saving lives - not tracking expiration dates. Emergency Responders Network offers solutions to assist you in managing your program components (i.e. training, expiration dates, quality assurance, etc.). Additionally, we offer an equipment and program indemnification option that will help protect your business and allow you to focus on the business of running your business!

PROGRAM IMPLEMENTATION AND BEYOND:

Our comprehensive Implementation Guide serves as the cornerstone of your successfully implemented AED Program! Among other things, it assists the program manager in:

- Establishing your Program
- Program Organization Development
- Internal Emergency Response system breakdown
- Comprehensive Training Program
- Standardized Forms, including "The Prioritized Checklist"
- Contacting ER Network, Inc.
- Providing system wide consistency
- Purchasing accessories and add-ons

"You'll not only have all the tools needed to implement and maintain an efficient AED Program, you'll also have the support structure required to make it happen!"

Interactive Training
